ABOUT ME

I graduated from Mae Fah Luang University with a degree in Software Engineering. I am currently 23 years old and have experience as a UX/UI design intern. I also have knowledge in front-end development. I am now looking for opportunities to work in the IT field, where I can apply both my technical knowledge and design skills to real projects, while continuing to learn and grow as part of a collaborative and creative team.

WORK EXPERIENCE

JAN 2026 – NOW

WIS KARKETING
Web Designer

Receive requirements and CI from the CEO, then begin designing the website based on the requirements and references. Once the design is approved, proceed to develop the website using WordPress. After that, create a website report covering SEO, performance, and other aspects, and provide training to the client on how to use the website.

- The tools used are Figma, WordPrees and Microsoft office.

JAN 2025 – APR 2025

SUPER COCONUT
Internship UX/UI Designer

In this internship, I was responsible for designing, improving, and redesigning the product's UI to make it more visually appealing and easier to use. I also created a test plan and conducted user testing to evaluate whether users followed the planned workflow.

- The tools used are Figma and Microsoft office.

JAN 2024 – NOV 2024

MAE CHAN HOSPITAL
PROJECT
Website designer &
Developer

In this project, Mae Chan Hospital is a stakeholder. The project is related to managing stretcher transport staff in the hospital.

It is a group project with 4 team members. I am responsible for designing the website UI in Figma, coding the front-end and a little bit document.

- The frameworks used are Vue.js and a little bit of React.js, styled with CSS, and the back-end is PHP.

AUG 2022 – NOV 2022

ISUZU PROJECT
Website designer &
Developer

In this project, ISUZU Chiang Rai Branch is a stakeholder. This project is about managing car and handling customer invoices, with notifications on the dashboard of the web application.

It is a group project with 6 team members. I am responsible for designing the website UI in Figma and coding the front-end.

- The frameworks used are Vue.js, styled with CSS.
